Continuation of Substance of Interview including description of the general nature of what was discussed:

I question James Barlow about the wording of Claim 44, stating that it was unclear as to how functioning as a motor caused functioning as a generator.

James Barlow stressed his opinion, that I was miss-reading the claim, stating that the claim set forth different operational modes the unit could run in; namely as a motor, as a generator or in an unloaded mode. James Barlow suggested the claim language, while not perfect was satisfactory and did not warrant any changes.

I agreed with James Barlow.
